## Where Innovation Meets Integration

Position: **Developer / Analyst / Programmer**  
Location: Langley Park, County Durham  
Salary: Starting on 26k - 32k depending on experience  
Job Type: Permanent  
Company: Sum-It Computer Systems Ltd.

We are looking for an experienced analyst/programmer who is ready to take the step up into a senior role. The successful candidate will not only be involved in developing software but will soon have a large part to play in the design and specification of software plus general development planning. They will work at our small, professional and busy development office, near Durham, where we develop and provide secondary support for specialist agricultural software. Established in 1981, Sum-It is a leading provider of IT solutions to the farming community with over 3000 customers nationally. This role is the starting-point for a fulfilling career path within the company.

The successful candidate will be involved throughout the entire development process from design, programming, testing and implementation through to end user support and must have relevant experience in a similarly versatile and diverse work environment.

### If you:

- Have at least 6 years experience in a busy software development team driven by quality and on-time delivery.
- Have at least 4 years experience working with 'data' orientated applications using VB6 (Exposure to VB Net & other languages will be a bonus).
- Understand that the development process, and the technical brilliance of your code, means nothing to the end user – they require a product that suits them, does the job and is the right price.
- Have an excellent 'eye-for-detail' in your whole approach to work.
- Are highly numerate, a very logical thinker, self-motivated and able to prioritise your own workload.
- Can work well under pressure and stay focused to complete the task in hand within strict time frames.
- Have the ability to develop good working relationships with all other members of staff.
- Preferably, have a farming/rural background.

Then we are interested in you.....

### The successful candidate will:

- Predominantly develop using VB6 with opportunities to use VB Net or other languages in the future.
- Work in a small team of 4 developers (not all at the same location).
- Provide technical support to our general support team and occasional support direct to users.
- Take responsibility for defined areas of our main product.
- Quickly move towards managing small bespoke projects.

If you think you would bring exceptional qualities to our team we would like to hear from you. Qualifications are less important to us than finding someone with the right mix of personality, experience and positive attitude, with the ability to help move the company forward. To apply, please email your CV with a covering letter to Tom Ley: tom@sum-it.co.uk Expected Interview dates are 9<sup>th</sup>/10<sup>th</sup> February 2012.
